

Make room for everyday.

THE ROBINSON BRAND SYSTEM

A scalable identity for homes, properties, people
and the next chapter.

A brand built to grow.

A recognizable family name. A practical service. A confident visual signature.

The idea

Make room for everyday. Appliance rentals should make the next step feel manageable. The brand balances household warmth with operational competence.

What stays constant

The Robinson name, split-R mark, evergreen anchor, typography and direct voice form the permanent core.

What can evolve

Categories, regions, offers, channels, photographs and service programs can expand without replacing the identity.

Who it serves

Residents and families who need appliances, and property owners or managers coordinating appliance needs across homes.

What it should feel like

Capable, straightforward and welcoming. Avoid luxury posturing, discount-store clutter and unsubstantiated savings claims.

One mark. Many settings.

The split-R is a simple, scalable symbol of the Robinson name.

The signature

The open counter and diagonal cut create a recognizable silhouette. The fresh-green base gives the mark a point of energy.

The production master

Every delivered logo SVG uses native paths, including the wordmark. There are no embedded bitmap images or live font dependencies.

Choose the right lockup.

Use the complete business name wherever the audience is meeting you for the first time.

PRIMARY / HORIZONTAL

SECONDARY / STACKED

ICON / REPEAT USE

The icon works for favicons, avatars, app navigation and repeat brand encounters. Keep “Appliance Rentals” visible elsewhere in the surrounding context.

Give the logo room.

Clear space protects recognition. Minimums below are starting standards, not a substitute for a physical proof.

Clear space

Keep at least one quarter of the R-mark height clear on every side of the visible logo. No text, trim edge, handle, seam or competing graphic enters this space.

Minimum size

Full horizontal logo: 240px wide online or 2.25in wide in print. Stacked: 180px or 1.5in.
Standalone mark: 24px or 0.25in. Use dedicated icons at 16px.

KEEP IT INTACT

Do not stretch, rotate, outline, add shadows, add gradients, change the cut, retype the wordmark or place the logo across a busy photograph. Use the supplied one-color version when production is limited.

Green, with breathing room.

Evergreen leads. Ivory gives warmth. Fresh green acts as an accent, not a page-wide default.

Evergreen

#123C2D

Primary brand / buttons

Fresh

#B9E66B

Accent / emphasis

Ivory

#F7F5EC

Main light background

Ink

#17251E

Body text

Sage

#DCE7DF

Quiet surfaces

Muted

#4E6658

Secondary text

Typical marketing composition: roughly 55% ivory, 30% evergreen, 10% neutral and 5% fresh green. Treat this as a useful balance, not a rigid quota. The monochrome system remains fully valid.

Light and dark, equally clear.

A coordinated theme system keeps the brand recognizable throughout the website and owner portal.

LIGHT

Your next step.

Appliance rentals for the way you live.

DARK

Your next step.

Appliance rentals for the way you live.

Explore your options

Pair colors deliberately

Use white on evergreen, ink on ivory and evergreen on fresh green. Fresh green is not body text on white. Muted text, borders and focus rings have separate theme tokens.

Preserve meaning

Keep focus visible. Pair every status color with a label or icon. Errors are not green. Use semantic error, warning and success tokens independently of the marketing palette.

Typography with confidence.

Manrope is the primary family. Use weight and space to create hierarchy.

Make room.

Manrope ExtraBold / 800

Clear information. Easy next steps.

Manrope Bold / 700

Use simple sentences and comfortable line lengths. Give customers the information they need to understand the next step without decoding industry language.

Manrope Regular / 400

Practical scale

Web: 48-80px hero, 32-40px section title,
20-24px card heading, 16-18px body, 14px label.
Print body: generally 10-12pt.

Fallback and licensing

Use Arial in email. Fonts and license are included. The logo is outlined artwork; never recreate it with ordinary typed text.

Speak like a helpful expert.

Plain language, useful detail and a clear next step.

Primary brand line

Make room for everyday.

Plain-language descriptor

Appliance rentals for the way you live.

For households

Explore appliance rental options for your home. Start with what you need, and ask about availability in your area.

For property managers

More homes. One partner. Discuss appliance rental needs across your properties.

Write this way

Lead with the customer need. Explain the offer with short sentences. Use one clear call to action. State actual prices, terms and exclusions near the offer when confirmed.

Claims require facts

Do not publish “free delivery,” “same-day,” “no credit check,” “maintenance included,” “guaranteed” or “rent-to-own” until the exact offer and policy are verified.

A repeatable visual language.

Large type. Quiet backgrounds. One diagonal accent. Real people and real appliances.

Make room for everyday.

One message. One next step.

Layout

Build on an 8px spacing rhythm online. Keep text left-aligned in most communication. Reserve centered compositions for stacked logos or compact announcements.

Graphic devices

Use the triangular cut as a single corner accent or a low-contrast pattern. It is supporting texture, not a replacement for the logo.

Photography

Use real installed appliances and natural home environments. Show accurate scale, clean surroundings and warm daylight. Avoid fake customer photos or unsupported product depictions.

Icons

Use consistent 2px line icons with rounded ends. The included service icons support navigation; their presence does not promise a service is included.

Social that looks like Robinson.

Use the supplied artwork as a consistent starting point across campaigns.

More homes. One partner.

Explore your options

Included formats

Square 1080x1080, portrait 1080x1350, vertical 1080x1920, wide cover 1640x624, and website share 1200x630. These are working canvases; preview actual channel cropping.

Campaign discipline

Start with one audience and one action. Keep prices and conditions readable. Use the editable SVG source for new messages; do not squeeze a long headline into a short layout.

Print with confidence.

The brand system carries from a business card to a large sign.

Every detail matters.

Business documents should feel clear, calm and easy to use.

Included production sizes

3.5x2in business card, US Letter flyer and letterhead, 6x4in handout, and 24x18in sign. Bleed is included in the card, flyer and handout PDFs.

The PDFs preserve vector artwork and include trim/bleed boxes where specified. Colors are RGB masters. Ask the printer to convert with the correct output profile and provide a proof; these are not certified PDF/X or universal CMYK files.

Recognizable on the move.

Readable identification is more valuable than filling every inch of a vehicle.

Vehicle graphics

Use the horizontal logo, service descriptor and website. Supply exact vehicle make, model, year, panel measurements and photos to the installer. Avoid handles, seams, lamps and sight lines.

Uniforms and fabrication

Use one-color artwork for small embroidery, vinyl cutting and simple screen printing. Ask the vendor to proof small gaps and lettering. Stitch files are machine-specific and are not included.

Included panel artwork is scalable flat art, not a fitted wrap. The concept vehicle image is a visualization only. Do not fabricate from a generated mockup.

Everyday business, branded.

Make the operational side feel as considered as the marketing.

Customer communication

Use the business signature and email layout. State what happened, what happens next, who needs to act and when. Keep supporting detail beneath the main action.

Invoices and estimates

Fillable PDF templates support customer details, line items, amounts and terms. They do not calculate totals or connect to accounting. Verify values before sending.

Work orders

Capture the appliance or asset, requested scope, completion notes and responsible technician. Use your business system for approvals, routing and permanent records.

Implementation handoff

Copy logo assets and tokens into the website. Keep logos on correct theme backgrounds. Preserve button hierarchy, spacing and readable form states throughout customer and owner views.

Templates with empty fields or `{{tokens}}` are editing sources. Complete them before external use. No invented phone numbers, addresses, prices or legal terms are embedded in this kit.

Expand without fragmenting.

Keep one recognizable brand while the business develops new capabilities.

FOR YOUR HOME

FOR YOUR PROPERTIES

IN YOUR COMMUNITY

Treat categories, audiences and regions as supporting headlines, not independent logos. Add new appliance types through photography and copy. Keep the full business descriptor clear. A future move beyond appliance rental would require a deliberate naming decision.

A kit you can actually use.

Start with the guide, then choose files by job rather than by file extension alone.

01 Logos	Outlined SVG + PDF + transparent PNG masters
02 Icons	Avatars, favicon, app icons and web manifest
03 Design System	Palette, fonts, tokens, pattern and service icons
04 Social / Advertising	Finished graphics plus editable SVG sources
05 Print	Cards, flyer, handout, letterhead and sign
06 Vehicles / Apparel	Scalable panel and one-color uniform artwork
07 Web / Email	Theme CSS, preview, fonts and email layouts
08 Business Forms	Fillable invoice, estimate and work order
09 Handoff	Copy, production notes, setup and QA record

This is the v2.0 proposed production identity. The concept board is exploratory visualization; the vector masters are authoritative. Keep v1 separate for reference. Record any future approved changes in the version history.
